

EVERBUILD 501 PVA BOND

Colour	Product Code	Pack Size	Box Qty
-	PVA05L	500ML	20
	PVA1L	1LTR	12
	PVA2	2.5LTR	6
	PVA5	5LTR	4
	PVAB25L	25LTR	1

Product Description

EVERBUILD PVA BOND is a medium viscosity, polyvinyl alcohol stabilized, externally plasticised, vinyl acetate homopolymer. Contains no harmful phthalates.

It has been designed specifically for use in the building industry as a general purpose bonding agent, and additive for concrete and plasters and as a multi-use adhesive.

PVA BOND meets the bond strength requirements of BS5270, "Polyvinyl acetate (PVAC) emulsion bonding agents for internal use with gypsum building plasters".

Benefits

- Greatly improved adhesion to a wide range of substrates including dense concrete, glass, steel, tiles etc.
- Mixes may be applied in much thinner sections resistance to salt permeation.
- Reduced surface dusting of concrete
- Improves flexibility of sand cement products.
- Reduced water: cement ratio for equivalent workability
- Improved frost resistance
- Reduces surface porosity of mortar/plaster

Universal polyvinyl acetate (PVA) adhesives or bonding agents find wide use in the building industry. The areas of use are generally non-specialised, however, there is a requirement to meet BS5270 "Polyvinyl acetate bonding agents for internal use with gypsum modified plasters".

PVA BOND meets the requirements of the Universal PVA market and can be used in a similar fashion to other phthalate plasticised PVA emulsions and visually appears no different.

PVA BOND contains an environmentally acceptable non-phthalate ester plasticiser to enable low temperature film formation and confer film flexibility.

BONDING AGENT REQUIREMENTS

- Fulfilment of the requirements detailed in BS5270*
- Does not contain a phthalate ester plasticiser*
- Good selling properties*

- (d) *Effectiveness as a general purpose wood adhesive*
- (e) *Compatibility with cement and gypsum*
- (f) *Goods adhesion to concrete*
- (g) *Excellent high and low temperature stability*

PVA BOND MEETS ALL OF THE ABOVE REQUIREMENTS

Areas For Use

- As a general purpose adhesive for wood, cork, paper, textiles etc.
- As an admixture for mortar/screeds/renderers.
- As a bonding agent for screeds/renderers to difficult substrates.
- As a primer/sealer in tiling applications.
- As an internal filler when mixed with wood shavings, plaster etc.

Limitations

- Not suitable for external applications. Use EVERBUILD 503 SBR BOND
- As a wood adhesive, do not use as an externally / where water is likely. Use 502 All Purpose Weatherproof Wood Adhesive

Surface Preparation

All surfaces must be clean, dry and free from grease.

Application

PRIMING AND SEALING

Where the emulsion is to be used on porous substrates (old concrete, plaster, plasterboard etc.), it should be diluted 4 parts water : 1 part emulsion to seal the surface in preparation for further coating.

BONDING

PVA BOND can be used to bond plaster and cement renders/repair compounds.

To bond plaster, the emulsion should be used undiluted and brushed onto the surface to be plastered. Fresh plaster should be applied before the emulsion dries.

The bond strength of the plaster to the substrate meets the requirements outlined in BS5270 (Plaster bonded to glass).

To bond cementitious renders or repair compounds, two methods of use can be considered.

i) **Small areas**:- mix **PVA BOND** with an equal amount of water and add this to the mortar/concrete mix (the emulsion exhibits excellent compatibility with cement).

When added to a concrete/mortar mix, **PVA BOND** will improve adhesion and also flexural strength of the cured concrete in a similar way to conventional PVA bonding agents.

ii) **Larger areas**:- dilute the emulsion, 3 parts emulsion : 1 part water and brush onto the surface to be coated/repared. Apply a normal concrete mix before the emulsion dries.

WOODWORKING

PVA BOND will bond wood in similar fashion to conventional bonding agents.

The emulsion should be used neat in woodworking applications. In laboratory test, wood failure was observed in joints constructed with PVA BOND.

In common with conventional PVA bonding agents, PVA BOND should not be used for load bearing applications.

STORAGE STABILITY

PVA BOND exhibits excellent stability at high storage temperatures. After 1 weeks storage at 50°C no significant changes in viscosity were observed.

GENERAL PURPOSE ADHESIVES

PVA BOND can be used to stick paper, cardboard and othersimilar porous substrates.

Specific Data

Total Solids (%)	32-37%
Viscosity @ 23°C Brookfield RTV 5/20	7000-15000cps @23-25 Degrees C
pH	4.0-6.0
Minimum Film Forming Temperature (°C)	-2°C TO +5°C
High Temperature Stability (1 Week @ 50°C)	Stable
Specific Gravity	1.07

Performance As A Bonding Agent

	<u>BS5270 PERFORMANCE</u>
PVA BOND	PASS

Health & Safety

Consult MSDS for full list of hazards.

Storage

To ensure safe storage of PVA BOND, containers should be well sealed to prevent evaporation of water and the formation of skin on the surface. The emulsion must be stored at a temperature above freezing. A temperature of 5-25°C is recommended Higher temperatures will affect quality and cause the formation of crusts and skins, especially if the containers are not tightly closed or subjected to direct sunlight for long periods.

Shelf Life

12 months from date of manufacture in original unopened containers.

The technical data contained herein is based on our present knowledge and experience and we cannot be held liable for any errors, inaccuracies, omissions or editorial failings that result from technological changes or research between the date of issue of this document and the date the product is acquired. Before using the product, the user should carry out any necessary tests in order to ensure that the product is suitable for the intended application. Moreover, all users should contact the seller or the

manufacturer of the product for additional technical information concerning its use if they think that the information in their possession needs to be clarified in any way, whether for normal use or a specific application of our product. Our guarantee applies within the context of the statutory regulations and provisions in force, current professional standards and in accordance with the stipulations set out in our general sales conditions. The information detailed in the present technical data sheet is given by way of indication and is not exhaustive. The same applies to any information provided verbally by telephone to any prospective or existing customer.
