10-30 minutes

TOOL CLEANING

Water

Product use

Liberon Wood Bleacher is ideal for removing dark stains caused by rust, alcohol, damp, ink, ring marks and fruit etc. It can also be used to lighten naturally dark wood or natural wood which has darkened through alkali products, staining or weathering.

Product application

Apply Liberon Wood Bleacher sparingly with a brush. Concentrate on badly affected areas if required. Allow to dry, check results and apply further coats if necessary. Rinse thoroughly 2-3 times with water and allow to dry completely before refinishing.

Important: Always test product first on a spare or inconspicuous surface to check colour, compatibility and end result. Residue from this product may be reactivated by water based products.

Precautions

Wear protective gloves. Due to various types of pigmentation some dyes/stains/woods may resist bleaching. Wood Bleacher relies on chemical reactions – results cannot be guaranteed.

Packaging

Wood Bleacher is available in 125 ml, 500 ml and 5 L containers.

Health and Safety

Harmful. Contains Oxalic Acid. Flammable. Harmful by inhalation, in contact with skin and is swallowed. Keep out of the reach of children. Keep away from food and drink and animal feeding stuffs. Do not empty into drains. Wear suitable protective clothing and gloves. If swallowed seek medical advice immediately and show this container or label. Use only in well-ventilated areas.
